MEDICAL FACIALS

Oxygen Facial with Peel

60 Minutes | \$240

Oxygen facial is a "non-medical" procedure created to hydrate your skin and support natural collagen to help you achieve a more youthful look. Oxygen facials deliver condensed molecules of oxygen to your skin, more specifically, your epidermis. Visibly smoothed lines and wrinkles for all skin types. Give your skin what it needs.

When used as a skincare ingredient, oxygen helps encourage a healthy skin barrier and hydrate the skin. When you give skin cells a healthy boost of oxygen, you help maintain your skin's health and keep it looking bright and healthy. Your skin may be craving a detox. Oxygen, nutrients, and vitamins added to an oxygen facial can help boost your skin's detoxification process and lessen the effects of environmental irritants and sun damage. Detoxifying your skin can also help work to restore skin cells.
